JOYSTICK FOR CABLES CONTROL

Joystick is a device that permits to control simultaneously 2 operating sections.

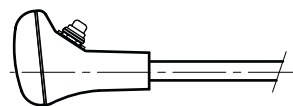

The kit includes cables to have remote control of directional control valve. Joystick can include one or two temporary switch or just one on-off switch.

Joystick has a mechanism that permits to block it completely or actuate it in only one or two directions.

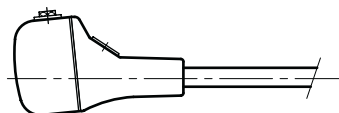

TECHNICAL DATA

Weight	1.3 (2.9) kg (lb)
Lever rate	1 : 8.8 (30.5 : 270)
Maximum load on the lever	17 (37.4) kg (lb)
Maximum load on the cable	150 (330) kg (lb)
Stroke	+/- 15 (0.6) mm (inch)

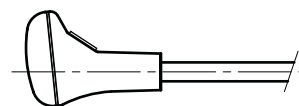

SWITCH TYPE

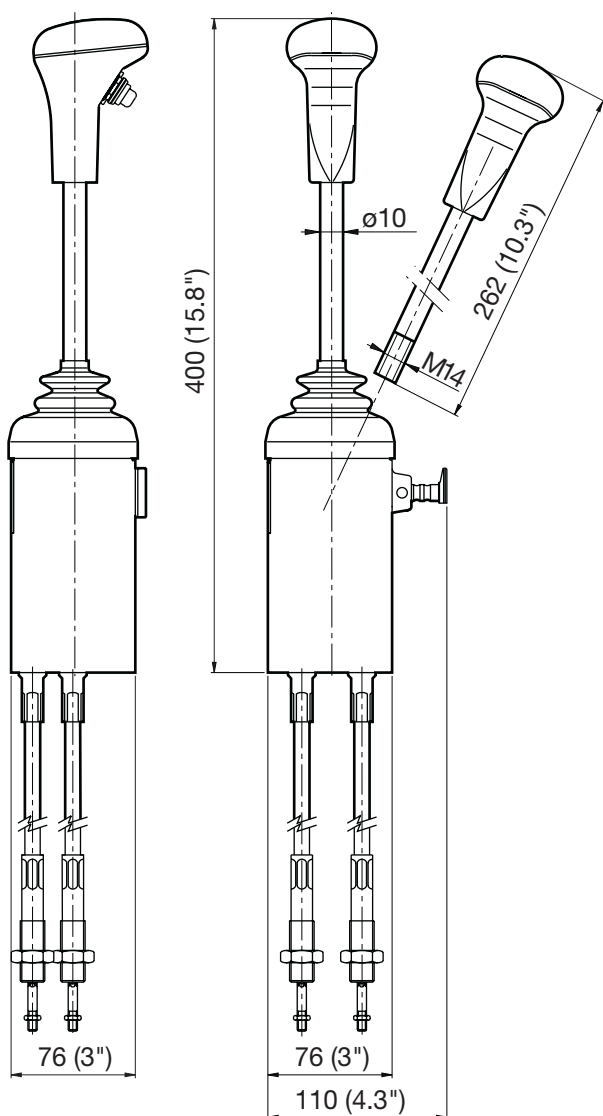

1 switch

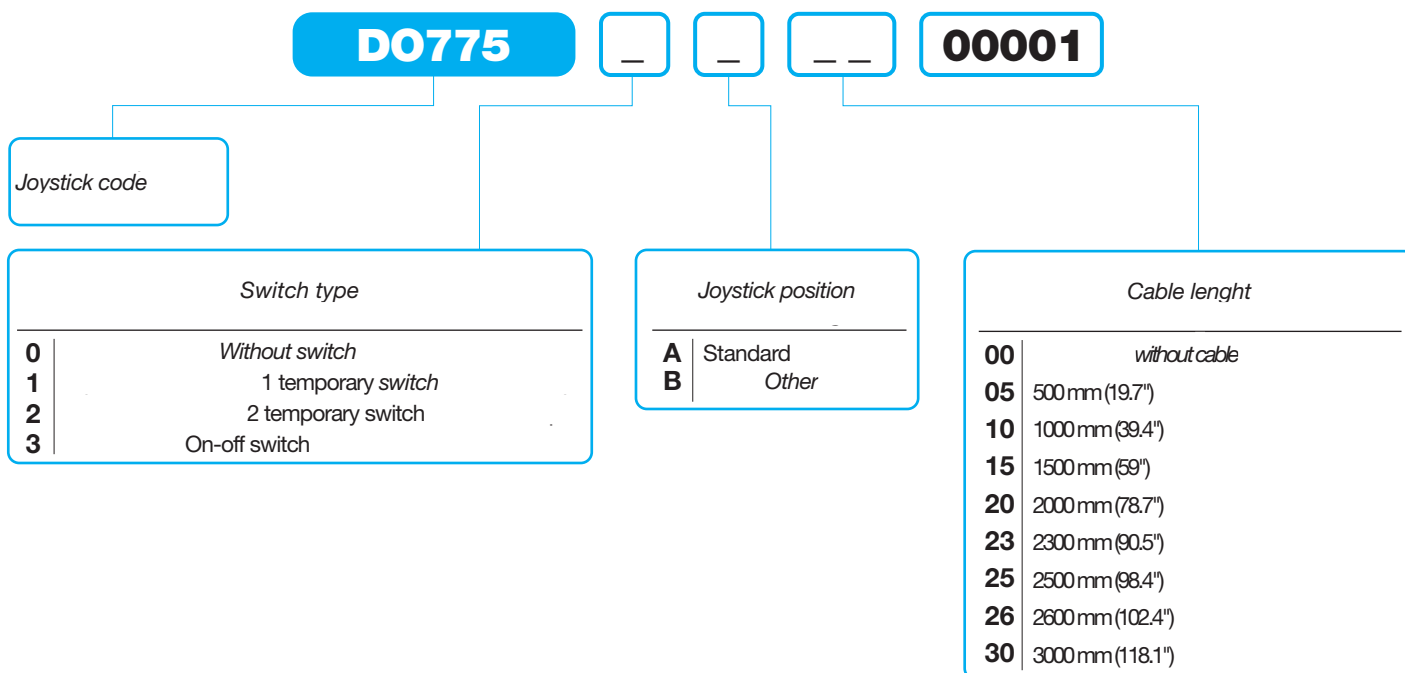

2 switch

Without switch

Note: joystick cables are different from those for the "driving block", but the "kit connection" is the same.

Cables and joystick are sold assembled using the codes shown above.

They can be bought separately only as spare parts.
