

How do I express my interest?

There are several ways you can express your interest in working at Custom Fluidpower including:

1. Visit the employment page on our website at www.custom.com.au/employment, complete the form and upload your resume.
2. Contact the branch you are interested in working at and ask to speak to the Branch Manager.
3. Email HR at human.resources@custom.com.au and attach a cover letter and resume.

Our preferred method is via the website, that way we can keep your resume in our online database for any future vacancies.

What if I'm not Australian?

We are happy to receive expressions of interest from international potential employees.

Custom Fluidpower is experienced in managing the requirements of international workers, including visas.

Dependant on the role you are interested in, we may be able to assist with relocation expenses.

Consider a Career With Custom Fluidpower

Adelaide | Brisbane | Emerald | Mackay
Melbourne | Naval Base | Newcastle | Perth | Singleton

Who is Custom Fluidpower?

Custom Fluidpower offers hydraulic, pneumatic, filtration and lubrication product sales along with complete system design, installation and commissioning, and service and repairs.

Servicing the agricultural, aerospace, exploration, industrial, marine, mobile, mining and material handling industries, we pride ourselves on supply of quality products, product knowledge and the application of innovative thinking to our customers' unique applications.

Wholly Australian owned, Custom Fluidpower has branches nationwide and can offer fast and reliable service where and when our customers need it.

The company is staffed with over 180 varied skilled personnel covering design, engineering, business development, product specialists, technicians, trainers and management.

Together they form a team that can provide extensive fluid power services to industry.

Possible careers with us

Hydraulic fitter

Service and repair hydraulic machinery and components, and construct fluid power equipment such as power packs.

Hydraulic engineer

Design complete fluid power system solutions, from the end user's requirements to a major mining project.

Sales representative

Assist customers and potential customers and solve their hydraulic component and system solution requirements.

Trainer

Provide technical and safety fluid power training to both internal employees and customers.

Product manager

Provide product specific technical advice to employees and customers and work on major projects and OEM requirements.

Workshop manager

Manage the efficiency and safety of a fluid power workshop environment.

CNC operator

Operate a CNC machine to produce customised hydraulic valve manifold solutions.

Sales and logistics

Ensure our customers receive their goods on time and in good condition.

Designer

Design hydraulic manifold circuits using the latest in 3D technology.

Benefits of working for us

Custom Fluidpower is an employer of choice in the fluid power industry because we understand that our people are our greatest strength.

Safety

Zero harm is our goal. If it's not safe, we make it safe. We want our people to return home to their families safely each day.

Professional Development

Receive support for furthering your career through attending external workshops, training courses and networking.

Training

We are a Registered Training Organisation. This means we can educate you in-house and provide you with certification of your learning.

Career Progression

Our company is successful and growing each year. This often opens up opportunities for internal promotion within the organisation.

Reward and Recognition

We believe in rewarding our people for a job well done. We have an employee recognition program in place.

Flexibility

Your family comes first and we understand that you might need flexibility in your working arrangements. You also might like to try working in another branch.

Fun

Generally, we're a great team to work with. Workmates often enjoy a joke or two to help make the day enjoyable.
